ABOUT US

The GARD Lab investigates how environments shape human health and wellbeing. We are located within the Psychology Department at the University of Maryland, College Park, led by Dr. Arianna Gard

ABOUT THE PROGRAM

We are recruiting 6-8 students to participate in a 7-week (approx. 10hr per week) science research internship. Interns will collect data on neighborhood quality, and heart rate data using Fitbits. You will also learn how to analyze data and present results to your community about how environmental quality impacts health and wellbeing. Students will receive \$975 in compensation.

YOUTH INTERNSHIP PROGRAM

The Community and Resilient Environments (CARE) Youth Internship Program is designed to empower young people to conduct research on their own communities!

REQUIREMENTS

- At least 12 years of age
- Currently enrolled in middle/high school
- Lives in the Brightwood/Manor Park or Trinidad neighborhoods in DC
- No experience in data collection or analysis is required.

ADMISSION PROCESS

Email gardlab@umd.edu with the subject line "YPAR Applicant". For questions or more information see our contact information below.
